

Checklist for the 500 species recorded for North Carolina

This checklist provides a compendium of all of the bird species accepted by the NC Bird Records Committee to either the Definitive List or the Provisional List in North Carolina. Species not on the Definitive List or the Provisional List are not included; thus, species considered of Unaccepted Origin (such as several waterfowl and parrot species) are not a part of this checklist. As of the end of June 2021, there are 489 species on the Definitive List, and 11 species on the Provisional List, for a total of 500 species on the Accepted List (Definitive List + Provisional List) for North Carolina.

Additionally:

Not Established List - Monk Parakeet,
Whooping Crane

Compilers: Harry LeGrand, John Haire, and
Tom Howard

Bird Checklist for North Carolina

NC Bird Records Committee List

This is a list of all species accepted by the North Carolina Bird Records Committee as of its annual report for 2019. Taxonomy follows the AOS Check-list of North American Birds through the 62th Supplement.

All species in regular type are on the Definitive List. All species with the common name in italics are on the Provisional List.

Province Status: M P C

Relative abundance within a province is indicated for Mountains, Piedmont, and Coastal Plain.

- 1 = reported for less than 25% of that province's counties
- 2 = reported for at least 25% but less than 75% of that province's counties
- 3 = reported for at least 75% of that province's counties
